

Advantages of conducting clinical trials in South Africa

- Established regulatory agencies and Ministries of Health. The South African Health Products Regulatory Authority (SAHPRA) was established in 1965 and provides for the monitoring and evaluation, regulation, investigation, inspection, registration and control of medicines, scheduled substances, clinical trials and medical devices, in vitro diagnostics and further matters related to the public interest.
- SA-GCP is based on ICH-GCP and provides added protection for vulnerable populations
- Established Research Ethics Committees
- Sites are ICH-GCP compliant
- Experienced clinical trial sites
- Multinational trial experience, that means sites are familiar with FDA requirements
- Patient recruitment is characteristically faster than in the US and Western Europe
- Diverse patient population
- Emerging and first world disease indications
- Seasonal reversal, with respect to the Northern Hemisphere, allows companies to shorten clinical trial timelines

african clinical research organisation
transforming ideas into solutions

ACRO, African Clinical Research Organisation, a private company launched in August 2007, was the first South African, full-service, BEE contract research organisation.

ACRO, Offers services in Southern Africa and other African regions and is active across a broad range of clinical areas including, but not limited to:

Metabolic	Ophthalmology
Respiratory	CNS
Vaccines	Infectious Diseases
Oncology	Medical Devices
Endocrine	Wound Care and
Renal	Other rare diseases

An important aim of the organisation is to help improve the care of those affected by HIV/AIDS, tuberculosis, malaria and other diseases prevalent in other African populations.

ACRO is committed to capacity building across Southern Africa and has formed strategic development partnerships with a solid base in South Africa and an African emphasis.

ACRO employees have experience in a multinational environment and clients are guaranteed that their trials will be conducted to international standards, with competitive local South African costing.

ACRO is ideally positioned to "transform ideas into solutions".

ACRO offers services to donor-funded organisations, non-governmental organisations, research institutions, academic institutions, pharmaceutical companies, medical device companies, complementary medicine, food product, cosmetic companies and government institutions.

ACRO works both within and outside the biotechnology sector.

Our Service Coverage in Africa
